

RemedyMD Disease Registries are disease-specific electronic data capture forms for demographic, clinical, and genetic information. Our Disease Registries are highly configurable so you can collect the information you want quickly - without needing programmers. RemedyMD has over 100 pre-built registries so you can be up and running in weeks rather than months.

## Pre-built Disease Registries Now Available

### Breast

Breast Disorders

### Cardiovascular System

Congenital Heart Disorders  
Myocardial Disorders  
Pediatric Cardiothoracic Surgery  
Valvular Heart Disorders  
Vascular Disorders

### Digestive System

Esophageal Disorders  
Gastric Disorders  
Inflammatory Bowel Disease  
Intestinal Disorders  
Liver & Biliary Tract Disorders  
Pancreatic Disorders

### Endocrine System

Diabetes  
Obesity  
Other Endocrine Disorders  
Pediatric Diabetes  
Thyroid Disorders

### Female Reproductive System

Female Reproductive System Disorders

### Head and Neck

Head & Neck Disorders

### Hematopoietic System

Coagulation Disorders  
Hodgkin Lymphomas  
Myelodysplastic & Myeloproliferative Syndromes  
Non-Hodgkin Lymphomas  
Red Cell Disorders

### Male Reproductive System

Male Reproductive System Disorders

### Musculoskeletal System & Soft Tissue

Bone Disorders  
Cleft Palate  
Joint Disorders  
Other Soft Tissue Disorders  
Scoliosis  
Skeletal Muscle Disorders

### Nervous System

Nervous System Degenerative Disorders  
Other Nervous System Disorders  
Peripheral Neuropathy

### Other Diagnosis Groups

Behavioral Disorders  
Metabolic Disorders  
Normal  
Nutrition  
Obesity  
Other Neoplastic Disorders  
Pediatric Surgery (Neonatal)  
Serosal Inflammatory Disorders  
Systemic Allergic Condition  
Systemic Infections

### Respiratory System

COPD & Asthma  
Other Pulmonary Disorders  
Pulmonary Infections & Inflammation

### Skin

Skin Disorders

### Urinary System

Urology: Kidney & Bladder

### Oncology

Breast Malignant & Pre-Malignant Neoplasms  
Esophageal Neoplasms  
Gallbladder, Extrahepatic Bile Ducts & Ampulla of Vater Neoplasms  
Gastric Neoplasms  
Liver & Intrahepatic Bile Duct Neoplasms  
Pancreatic (Endocrine) Neoplasms  
Pancreatic (Exocrine) Neoplasms  
Other Endocrine Neoplasms  
Thyroid Neoplasms  
Ovarian, Fallopian Tube & Peritoneal Neoplasms  
Uterine Neoplasms  
Vaginal & Vulvar Neoplasms  
Nasal Neoplasms  
Oropharynx Neoplasms  
Other Head & Neck Neoplasms  
Salivary Gland Neoplasms  
Other Hematopoietic Neoplasms  
Penile Neoplasms  
Prostate Neoplasms  
Testicular Neoplasms  
Bone & Cartilage Neoplasms  
Soft Tissue Neoplasms  
Brain, Spinal Cord & Meningeal Neoplasms  
Peripheral Nervous System Neoplasms  
Neoplasms of Unknown Origins  
Lung & Pleural Neoplasms  
Bladder, Ureter & Renal Pelvis Neoplasm  
Kidney Neoplasm  
Urinary System Disorders & Benign Neoplasms  
Cervical Neoplasms & Dysplasia  
Carcinoma of Skin  
Melanoma of Skin and Nevi  
Acute Lymphoblastic Leukemia  
Acute Myeloid Leukemia

## Technically Speaking

RemedyMD Disease Registries are Web-enabled applications built with state-of-the-art Web browser technology. Our registries:

- Present a rich and intuitive user interface
- Provide Web-based access from anywhere you work
- Require no installation or onsite maintenance
- Require no onsite maintenance by the end user
- Provide the features of a client-server-based application (context-sensitive displays, drop-down lists, validation, and messaging)
- Provide highly responsive performance.

## Where is the Value?

### Enables real-time data collection and reporting

**HOW?** Our pre-configured electronic data collection forms collect clinical, genetic, and image data elements. You can personalize each registry to your individual workflows enabling you to spend more time in front of patients.

### Minimizes implementation time for projects

**HOW?** Each pre-built disease registries comes with a standard set of reports and dashboards that enable researchers and physicians to report on key metrics immediately.

### Manage patient outcomes effectively

**HOW?** Our Disease Registries enable you to collect more in-depth data than traditional electronic medical record systems. Now you can recognize new patterns within your data and make real-time decisions on treatment protocols.
