

RemedyMD's Grant Central™ is a Web-based application that enables you to manage all aspects of the research grant process, from the call for abstracts to the funding of projects to completion. This application enables you to:

- Issue concurrent calls for abstracts
- Receive abstracts
- Assign reviewers
- Score abstracts
- Approve proposals
- Award funds to projects
- Receive progress reports
- Report progress through all stages

Grant Central also helps you streamline your constituents' workflows through the creation of personalized portals based on different roles (e.g., reviewers, investigators, grant administrators, financial administrators).

Technically Speaking

- J2EE standards-based technology
- Modern n-tier architecture with encapsulated business logic
- Latest version of Oracle
- Front end is a rich browser client based on AJAX
- Business tier is written in PHP and Java running on standard open-source application servers
- Hosted solutions require only a browser for deployment

Where is the Value?

Increase efficiency across your organization

HOW? Configure and automate series of tasks to suit your unique workflows. The *Messaging* feature enables you to communicate securely with your end users and the *Reports* feature helps identify bottlenecks within your workflows.

Personalize Grant Central to suit your environment

HOW? Every institution manages their grant processes uniquely. Grant Central can be easily configured to suite your unique workflows. This functionality helps you build on your unique capabilities.

Real-time reporting enables efficient grant management

HOW? Grant Central's easy-to-use QueryBuilder™ tool enables you to aggregate, mine, and cross-reference data to identify trends and ask complex questions. *Dashboard* tools enable you to graphically represent your data to monitor progress in real-time, helping you make timely decisions. Both these tools ensure that you have all the facts available to you at the right time and in the right format. Easily export and publish your results.

Increase your competitive advantage

HOW? Grant Central presents you with a centralized infrastructure that makes it easy for you to catalog all your proposals over multiple cycles. You can use this infrastructure to leverage your information over time. Furthermore, you can answer questions about common projects across multiple institutions and investigators right away. The goal is to increase commercialization opportunities and translate research results more rapidly into effective treatments.

"Forward thinking, adaptable and cost efficient technology investments are a critical strategic tool for disease focused organizations such as The ALS Association, enabling them to leverage vast knowledge bases to be more effective at directing research and other core activities. The vision is to converge clinical/patient, research, legislative and donor/investor data onto a unified system to make clinical research more effective, more quickly."

- Lucie Bruijn
Senior Director and Vice President
The ALS Association
